Editor-in-Chief: Prof. Ahmad Umar

A Special Issue

on

“Functional Materials for Energy and Environment: Progress and Perspective”

Guest Editors

Dr. Kalisadhan Mukherjee
DST-Inspire Faculty Fellow
Centre for Advanced Materials Processing
Central Mechanical Engineering Research Institute
Durgapur-713209, West Bengal, India
Ph: 91-9775552143
Email: kalisadhanm@yahoo.com

Dr. Ramendra Sundar Dey
Scientist
Institute of Nanoscience and Technology (INST), Mohali Habitat Centre, Sector 64, S.A.S. Nagar, Mohali-160064, Punjab, India
Office: 0172-2210075, Extensions- 114
Mobile: +91 9775549822
Email: rsdey@inst.ac.in

Dr. Chandi Charan Malakar
Assistant Professor
National Institute of Technology Manipur
Department of Basic Science (Chemistry)
Langol, Imphal-795004, India
E-mail: cmalakar@nitmanipur.ac.in
Tel: +91 9862532117, +91 8197295022

Dr. Biplab Paul
Assistant Professor
Energy Materials Group
Thin Film Physics Division,
Department of Physics, Chemistry and Biology (IFM) Linköping University, Sweden

Call for articles

In continuously growing technology driven society, the devoted activities towards the research arena of renewable energy and green environment are indispensable for the sustainable future. Till date, fossil fuels (coal, oil and gas) remain the main source of energy for various industrial and domestic applications. However, uses of such finite fossil fuels are not desirable for sustainable and environmentally friendly development and thus the researchers all over the globe are keen to explore the renewable energy sources. In addition, the rapid growth of industries and due to some unavoidable human practices the pollution of environment is also becoming a threat to the society. In this context, a broad spectrum of materials including but not limited to inorganic, organic, ceramic, polymeric, carbonaceous and their composites have been investigated to address/solve the challenges on the energy and environment related research issues. Hence, research articles on the progress and perspective of these functional materials towards the renewable energy and green environment seem to add immense impact to the existing knowledge of researchers related to this field.

Viewing the demand of materials for energy and environment related applications; we would like to timely announce a call for articles to make a special issue entitled "Functional Materials for Energy and Environment: Progress and Perspective". This special issue will be published in the journal of "Energy and Environment Focus" (http://www.aspbs.com/efocus) by American Scientific Publishers.

Manuscript preparation and submission

Manuscript should be original research works on experiment or theoretical studies, or review articles. Manuscript should be prepared according to Journal’s guidelines, available at http://www.aspbs.com/efocus/. Authors must submit a single file consisting of all contents including text, figures and tables etc., in MS Word format directly to the Guest Editors via email. Authors can also submit a single file denoted as submission to this special issue in cover letter through the manuscript submission on http://mstracker.com/submit1.php?jc=efocus. Please indicate in your cover letter that the manuscript is original and has not been published previously and is not currently submitted to any other journal and will not be submitted elsewhere before a final decision is made by this journal. It is mandatory that authors must send a graphical abstract for each submitted manuscript. All manuscripts will be peer-reviewed to ensure high quality of publication. Early submission will get preference for review and publication process.

Important Dates

Last date for submission of article: 31st July, 2016; Authors’ notification: 31st August, 2016; Publication date: 30th September, 2016
