

Journal of Medical Imaging and Health Informatics

(JMIHI): 2015's SCI-IF 0.877

A medium to disseminate novel experimental and theoretical research results in the field of biomedicine, biology, clinical, rehabilitation engineering, medical image processing, bio-computing, D2H2, and other health related areas.

Call for Papers

Special Issue on

Clinical based Health Informatics

Aim

Clinical based health informatics is the field devoted for analyzing the different kinds of theoretical and experimental process about the clinical based health information in term of patient and researcher views. The main focus on this processes and clinical based health informatics is that empower the clinical and human health data and research work for example health information literacy, Internet-based health resources and strategies personal and health records The shift in this view of clinical based health informatics analyzes the requirements of clinical and biomedical re-habitation process. In this special issue additionally integrates and models the preferences of different kinds of biomedical and health informatics system. These kinds of information stand at the disciplines for example health communication science, medical library science, different kinds of health education, health promotion, public health biomedical information, nursing and clinical informatics. Basically in this special is concentrated on experimental and theoretical research results in the field of biomedicine, biology, clinical, rehabilitation engineering, and dental related clinical research. The main aim of this special issue is to improve the quality of patient wellness and patient care by examining the different kinds of patient records and suggest the better way of diagnosing system.

Scope

Authors are invited to submit their original manuscripts in this special issue on **Clinical based Health Informatics**. The scope of this special issue includes in Clinical based Health Informatics such as

- Computed tomography
- Nuclear Medicine
- Magnetic resonance imaging
- Ultrasound
- Dental related clinical research
- Infrared imaging
- Bio-signal Processing
- X-Ray
- Optical and confocal microscopy
- Rehabilitation and Clinical Engineering
- Health Informatics
- Cellular and Molecular Engineering
- Data mining techniques for clinical decision making
- Clinical Big data analysis
- Biomedicine application and implementation work
- Biological data analysis
- Biological engineering work
- DNA engineering
- Biomedical image processing

Submission Guidelines:

All manuscripts must be submitted via mstracker.com and authors are request to write in their cover letter that their submission is for this special issue and the name of the guest editor, so that the guest editor can be notified separately. Guidelines for preparation of the manuscripts are available at the journal website http://www.aspbs.com/jmihi/instauth_jmihi.htm. Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at <http://mstracker.com/submit1.php?jc=jmihi>.

Manuscript-Processing Fees: All new manuscripts submitted to this journal will be subjected to a Manuscript-Processing Fees. Research article publishing is not without occurring costs and the costs have been steadily increasing. To defray part of the publication cost, the journal will charge manuscript-processing fees, to be paid by the authors or their affiliated research institutions. The publication fee will be used to defray part of the occurring expenses associated with manuscript processing, editorial work flow, typesetting, proofreading, printing, online-hosting, and archiving. Authors or their

affiliated research institutions are required to pay **US\$1080** for their articles for a special issue article from all Countries. The authors will receive the PDF version of their research papers in final form. When submitting a manuscript through online, it will be processed with an understanding that the corresponding authors fully agree to pay all manuscript-processing fees upon acceptance. The author who submits the manuscript to the journal is fully responsible for the manuscript-processing fees. Accepted peer-reviewed manuscripts will not be processed and forwarded to production until all fees are paid in full to the publisher. Publisher will issue an invoice of manuscript-processing fees after a manuscript has been accepted for publication. Corresponding author will be asked to submit a signed Copyright Transfer Agreement (CTA) along with manuscript processing fees.

Submission Schedule:

Paper Submission: 10th May, 2018 or earlier with popular submission

Decision Notification: 10th Aug. 2018

Camera Ready Submission: 20th Oct. 2018

Special issue Publication: Dec. 2018 or earlier.
